

City of St. Marys
WATER METER REMOVAL AGREEMENT

We, the Owners/Tenants of the property identified below, hereby request that the water meter serving this property not be removed from the water service line inside of our residence while we are absent.

Property Address: _____

We understand that the water curb stop outside of our residence will be shut off by City personnel and that we will be responsible for shutting off the inside valve and guaranteeing that no water will enter the house while we are away.

We also understand that normally the City requires the water meter to be removed from the water service line and premises during long term shut-offs. We hereby request that this requirement be waived and we fully accept all responsibility for any damages caused by water leaking through the curb stop or inside valve while we are absent.
